

We provide optimized system solutions even there where you not expect it.

Fundamental knowledge and proven practical experience of the implementation and operation of supply and exhaust air systems for shooting ranges form the basis of all Strulik project designs.

Our vast number of reference design projects demonstrates the different applications, individual planning challenges and solutions that each indoor shooting range requires.

This is an excerpt of our reference list.

Governmental shooting ranges (selection)	number of supply air walls	construction
Rotterdam Police	1 SVA	2001
